Description

The Pearl P2050B Eliminator Redline Single Belt Drive Pedal is like having four pedals in one. The Eliminator Redline pedals fuse the stunning power and flexibility of the original Eliminator with the fluid speed of our Demon series pedals. With a host of radical improvements, Eliminator: Redline helps unlock perfect feel by locking in a cam, further pushing the boundaries of bass drum performance.

Features:

NINJA BEARINGS: Developed by skateboarding engineers for the ultimate in fast, quiet performance, NiNja Bearings incorporate state-of-the-art micro-polished steel balls for incredibly fast and smooth performance.

CLICK-LOCK SPRING ADJUSTMENT: w/ NEW Rotor Tension Cradle. Locks the desired spring settings into place and prevents tension creep under play. The counter spring adjustment's rolling cradle allows the spring to pivot with each stroke for less resistance. U.S. Patent #7754953

CONTROL CORE BEATER: With a reduced profile, Pearl's improved QuadBeater provides the same four beater surfaces of the original (two hard plastic, two felt) but with the added feel and power of the Control Core elastomer center to eliminate vibration. U.S. Patent #5610351 U.S. Patent #7626108

POWERSHIFTER FUNCTION: By moving the footboard forward or back, our revolutionary PowerShifter function provides 3 positions to fine tune the power and feel of the pedal. Instantly change the drive angle leverage to create a light, regular, or strong feel. U.S. Patent #5574237

UNI-LOCK BEATER ANGLE CAM: Grips the axel a full 360 degrees and allows infinite beater angle adjustments. Features the Floating Spring Pendulum design that is perfectly centered on the clamp for full bearing movement and maximum smoothness.

ZERO PLAY-HINGE: Our proprietary stainless steel hinge provides maximum freedom of motion for blazing speed and prevents play between the footboard and heel. U.S. Patent #7179978

INDEPENDENT TRACTION GRIPS: Eliminator Redline's redesigned pedalboard features Pearl's exclusive reversible Traction Plate insert, allowing individual traction grip configuration to suit your exact playing requirements.

ROLLER HOOP CLAMP: With Side Mount Adjustment. Quickly adapts to a wide range of hoop thicknesses for the smoothest, most secure grip possible. Easy side access to the hoop clamp makes set up and tear down a breeze. U.S. Patent #5726370
