Description

The Sabian SBHY42 Hybrid 42 Strand Snare Wires feature a perfect mix of metals that gives the hybrid blend a natural EQ performance. The combination of the specially formulated metals makes it easier to get a great snare drum sound.

PHOSPHOR BRONZE:

- Secret bronze formula developed specifically for snare applications
- An especially tight wind delivers additional snare-to-drum head contact
- Both the metal and the wind are designed to maximize attack

STAINLESS STEEL:

- 8 strands of high-carbon stainless steel in the center
- A larger wind increases the space between winds and reduces snare-to-head contact
- Delivers a fatter tone that is less staccato
