Description

The Dynasty P22-MTS Marching Tenor Stand is "State of the Art" in marching drum stands. It is designed to hold Dynasty USA marching multi-tenor drums. This revolutionary new stand is made of steel and powder coated aluminum. The result is a very durable stand that is unbelievably lightweight, and fully height adjustable. One leg of the stand "telescopes" inward or outward to allow the stand to be firm and stable on any uneven surface (like turf or rough terrain). Rough weather and strong winds are no problem for the Dynasty Multi-Tenor Drum Stand. Also included with a stand, is the P22-MTS-TM J-Bar Adapter. This adapter allows the stand to work with drums that utilize J-Bar style carrier hardware.

Dynasty Tenor Stand Features

- Lightweight Steel and Aluminum Powder Coat Construction
- Telecoping Leg for uneven surfaces
- Height range of playing surface from 33" to 41"
- Includes the P22-MTS-TM J-Bar Adapter
