Description

Yamaha's Crosstown Hardware Pack is the result of research and development conducted with artists and designers who determined just how light a hardware stand can be without sacrificing the durability and strength we have come to expect from Yamaha hardware.

These lightweight and durable stands provide a level of stability that is rare with other lightweight series.

The Crosstown pack comes with 2 CS3 cymbal stands, a HHS3 hihat stand and a SS3 snare stand. Each stand features channel-track aluminum bracing, non-slip rubber feet and a newly designed micro wing nut.

All of these features work together to produce an increased natural and open sound from cymbals and snare drums.

Each stand comes with its own protective sleeve and all stands fit into one, included, nylon carrying case for convenience.
