Description

The Innovative Percussion William Moersch IP511-IP514 mallets feature rubber cores wrapped in a light heather gray yarn. The rubber cores provide you with soft cloud like sounds at the lower dynamics and warm, dark, and rich sounds at higher dynamics thanks to the rubber core. All models are built on polished birch handles and the heavier cores increase projection and enhance the fundamental tone coming out of the marimba.

- IP511 - SOFT MARIMBA – RUBBER CORE
- IP512 - MEDIUM SOFT MARIMBA – RUBBER CORE
- IP513 - MEDIUM HARD MARIMBA – RUBBER CORE
- IP514- HARD MARIMBA - RUBBER CORE

Features:

- Heavier cores for increased projection & enhanced fundamental tone
- Large polished birch handles to assist with balance, control, and durability
- IP511-514 Rubber cores provide warmth, and darkness at all dynamic levels
