## Product Images

## Description

The Yamaha YBB-201M Convertible Marching BBb 4/4 Tuba features a convertible leadpipe that allows for concert band or marching band use. This instrument offers the versatility of a single instrument which is perfectly at home in either marching ensemble or in the concert hall. And its durable construction guarantees a long life of performances. The YBB-201M is used by many top drum corps in DCI.

## Convertible Leadpipe

The reinforced convertible leadpipe for marching allows the instrument to be played in concert and marching settings. The marching leadpipe also has an extra water key to facilitate drainage while marching. The marching leadpipe can be adjusted so the tuba is held on either the left shoulder or the right shoulder.

## Well Balanced

All Yamaha marching instruments are well-balanced, so they are easy to hold and maneuver while marching.

## Hand-Fitted Valves and Slides

Hand-fitted ensures an absolutely perfect fit and seal between the valve pistons and casing or slide parts. Such a fit helps to achieve smooth air flow and smooth action, and improves the response and intonation of the instrument.

## Laser-Fused Plasma-Welded Bells

A high-energy laser fuses the brass together for a virtually seamless bell, which results in continuous, even vibrations.

## Pressure-Formed Tubing

The perfectly rounded tubing results in less turbulence and a smoother air flow, thus making possible an excellent scale and reduced resistance.

## Heavy Bracing

All Yamaha marching instruments have heavy bracing throughout, so they are more durable at vulnerable points and can withstand the rigors of use in a marching band.

## 1st Valve Thumbhook

All marching brass (except for the YEP-201M) feature a 1st valve thumbhook for intonation adjustments.

## Specifications

Key: BBb

Playing Weight: 19.8 lbs

Bore Size: .728"

Bell Size: 17 1/2"

Body Material: Yellow Brass

Leadpipe Material: Gold Brass

Valves: 3 Front-Action Pistons

Valve Material: Nickel-Silver

Finish: Silver-Plated

Mouthpiece: 67C4

Case: Hardshell Case
