Description

Designed with Etymotic Research, Vic Firth Earplugs are the world's highest fidelity non-custom earplugs. They are configured to replicate the natural response of the ear canal so that when sound enters the earplug, it is reproduced exactly as the ear would hear it, only quieter. Clarity of speech and richness of music are preserved rather than muffled. The unique design of these earplugs allows musicians and music lovers to protect their hearing without sacrificing the ability to hear and respond to musical nuance.

Each package of Vic Firth High-Fidelity Earplugs includes a heavy-duty neck cord with strong connectors to keep earplugs together. The handy carrying case is effective for storage, protection and portability. Vic Firth High-Fidelity Earplugs are low cost, reusable, and reduce sound by approximately 20 dB at all frequencies.

(due to variations in production, appearance of product may vary slightly from photos.)
