Description

The One Vibe, by Marimba One revolutionizes the 3- octave vibraphone has amazing projection, warmth and resonance. The 9011 model features silver bars but does not include motor. Designed from the ground up by Ron Samuels and the same team of engineers and master craftsmen that bring you the world's most respected marimbas. These vibraphones are 100% designed and built in Arcata, California, USA.

Full-size keyboard is 100% evenly dampened

The damper mechanism features a fine adjustment and dampens each bar 100% evenly.

Izzy height adjustment system
The gas spring height adjustment system allows you to raise and lower the vibe smoothly and effortlessly. Built-in tape measures insure your preferred keyboard height.

Adjustable damper pedal
The damper pedal is height adjustable and can swivel side to side.

Fans always stop in the vertical position
No need to adjust the fans to the fully open position. The player is guaranteed the full resonance and projection of the vibe every time the motor is turned off.

Easy to transport
The most rigid frame in the industry, the easiest to assemble, and the lightest weight at 111 pounds (50 kg).
