## Description

The Black Swamp Multisonic MS5514TD 14x5.5" Titanium Elite Snare Drum is inherently crisp and articulate, but retains a pleasing warmth that will surprise and delight your ears. These drums "play deep" and have an exceptional tuning range. All the hardware holes are cut by laser, and we then craft the bearing edges and satin finish by hand. Truly a fabulous instrument to add to your drum collection.

The BSP Multisonic is still the most advanced, versatile, and silent snare system of its kind in the world. Five separate snare units can be tensioned and activated in any combination to suit your musical situation, drum tuning, and performance space. Here are just three example snare configurations demonstrating the Multisonic's potential to fit in perfectly to your music. 5 different types of wire and cable mix together for unique timbres and the ultimate in versatility. We suggest combinations of 3, but experiment to find your own voice.

Titanium Shell

Brushed Satin Finish

Die-Cast Hoops, Arch Lugs, Stainless Steel Tension Rods

Multisonic Strainer - Five separate snare units can be activated individually, utilizing cable and wire snares for multiple timbre possibilities.

Snares - Each snare unit responds at different volume levels for maximum response through every dynamic.

Remo Renaissance Drum Heads

## Stock Snare Assembly

6 Strand Gold Cable - The thickest cable type with a throaty character, similar to traditional gut snares.

8 Strand Blue Cable - Responds best at medium to loud dynamic levels, providing both articulation and volume.

6 Strand Stainless Cable - Responds best at soft to medium dynamic levels. The bright, wet character balances the drum's voice.

8 Strand Stainless Cable - Responds best at soft to medium dynamic levels. The bright, wet character balances the drum's voice.

5 Wire Wound Cable - The crisp, bright character provides the greatest sensitivity and response at softer dynamics.
