Description

The Sabian 50403H High Octave Low Profile Crotales are made of B20 bronze and come with 13 chromatic notes Middle C to High C. These crotales have been designed to meet the exacting standards of the world's most discerning musicians. Both Crotale sets are tuned to A=442 and offer excellent projection and sustain, with pitch and intonation remaining crystal clear throughout the duration of each note

The redesigned Sabian Crotales feature countersunk center holes to accept recessed rubber caps, and shorter mounting pins. This combination allows the caps to sit almost flush with the Crotale surface, greatly reducing the possibility of extraneous noise when performing.

The included mounting bar has a multi-sized receiver to fit a variety of cymbal stand bases. The mounting bars feature a steel reinforced stem that reduces the potential of breakage at this common stress point.

- 13 Pitches Middle C to High C
- Low Profile Mounting Bar Including
- A442 Tuning
- Cases and base stand sold separate.
