Description

The Aquarian TC12 12" Texture, Coated Series drumhead, is a 10mil, single ply, medium weight head that produces a responsive and resonant tone with sticks, mallets, and brushes.

The Aquarian Z-100 coating is one of the thinnest and most durable coatings ever developed. Unlike conventional coatings, it resists chipping, and it lasts and lasts and lasts! Aquarian "Safe-T-Loc" hoop, combined with our "Sound Curve" collar design provides for easy tuning, great stick response and zero slippage inside the hoop.

Aquarian's Texture Coated heads offer consistent tone, increased resonance, and the sensitive response that drummers expect from a traditional sounding single ply drumhead.
