

# Patterson Power Stainless SR-18 18 Strand Snare Assembly

Your Price \$59.99

MSRP \$91.00

## Product Images

## Description

Patterson Snare Wires drastically reduce the annoying "slap" and "buzz" of old wire coils from 80% to 90%!

Wires only produce sound where the point of the coil actually touches the head. (The empty coil space produces no sound.) That translates to only 3-4 inches of surface contact on a typical set of wires.

Patterson Snare wires lay against the entire surface of the bottom head, providing 14 to 23 feet of continuous head coverage. That represents 80 times the head contact of wires for greater sensitivity and projection.

Patterson Snare wires are not mounted in cheap glue or plastic. They are guaranteed never to pull loose or break! Patterson Snare wires articulate clearly at all dynamic levels. When needed, they provide unbelievable power!

Available in 12 strand coated Blue wires, 18 strand Stainless Steel wires, and 20 Strand Combo (12 Blue, 4 Stainless) models.
