Description

The Endurance Field Frame is the perfect answer to the demands of outdoor performance offering extra large locking precision wheels and sturdy oversized steel tube construction. The Endurance Field Frame easily

navigates rough, uneven outdoor terrain and still can be perfectly suited to indoor concert events as well. The Adams Endurance Field Frame is easily the sturdiest, best designed, highly adjustable frame on the market today. Both end caps of the Endurance Field Frame feature the renowned Adams Voyager Height Adjustment System, allowing you to effortlessly adjust the playing height of the instrument to fit any size player. A front Accessory Bar runs the full length of the frame allowing you to add drums, bells, cymbals, and virtually any instrument that can be mounted using standard Pearl Icon Rack hardware. This creates a multi-instrument percussion set-up that can easily expand as your needs change. The Adams Accessory Bar is completely square, providing a slip free mounting surface that will not creep or rotate, even under extremely heavy loads. Standard Pearl PCX-100 and PCX-200 Rack Clamps are used to mount all accessories to the bar using standard 7/8" diameter pipes and smaller. The Adams Endurance Field Frame is offered as a pre-configured frame option for many Adams keyboard instruments and are also available separately as an add-on package for all Adams Artist, Concert, and Soloist Series Marimbas, Concert and Soloist Xylophones, and the Concert Vibraphone.;; 1.5"; Square Steel Tubing;; Adams Voyager Height Adjustment System;; 8"; Pneumatic Double Locking Wheels;; Durable Powder Coated Finish;; Accommodates Pearl Icon Hardware;; Made to fit Adams Keyboard Instruments
