

# Marimba One Double Helix DHR2 Hard Rattan Marimba Mallets

\$61.99

## Product Images

## Description

The Marimba One Double Helix DHR2 Hard Rattan Marimba Mallets are a mid-weight mallet line designed to provide warmth and a full fundamental throughout the entire range of the marimba with a smooth, dark attack. Using two separate yarns, one synthetic yarn and one wool yarn wrapped with relaxed tension, Marimba One is able to provide a multitude of different sounds and feels.

Another unique design characteristics is the use of Dual Cores, a process called overmolding. This patented process consists of injection molded polymers carefully injected in hard and soft layers, resulting in a very consistent mallet which provides the ultimate marimba bar tone. This process, combined with various yarn tensions, also results in a nicely weighted and balanced head with wide tonal capabilities.

Color: Gray/Champagne  
Hardness: Hard  
Handles: Rattan

## Additional Information

SKU	258330
Brand	Marimba One
Model Number	DHR2
Series	Double Helix
