Description

The Grover T2/HS 10" Custom Dry Hybrid Silver Double Row Tambourine brings together the resonance of the popular German Silver model with the crisp clarity of our Heat-Treated Silver model tambourine. Well suited to all playing situations, the sonority of this tambourine is defined yet complex. This tambourine is especially effective in less than desirable acoustic environments. Clearly, the Hybrid Silver Tambourine is the perfect choice for players who demand the best of both worlds!

"The Hybrid tambourine combines the best of Grover worlds: the incredible articulation and vintage nuances

of the heat-treated instruments with the full, beautiful sound of the German Silver jingles. A perfect tambourine for every application--it has quickly become my "go-to" instrument!" John Parks, Assistant Professor of Percussion, Florida State University

*** Includes CTB tambourine bag and Roll Ring! ***
