## Product Images

## Description

The Remo Skyntone Diplomat SK-0014-00 14" Drum Heads are ideal for light Concert Snare and Jazz Drumset Snare, Tom & Bass drum applications. Featuring controlled high frequencies and dynamic sensitivity, Diplomat Skyntone is the closest synthetic drumhead ever produced compared to traditional calfskin.

These drumheads are constructed with 1-ply of a special surface-treated 5-mil film laminated to a 3-mil polyspun fiber. This head was developed by Remo's engineers to meet the demand for an incredibly sensitive snare batter head with warm articulation, and without unwanted overtones
