Description

The Evans G12 Clear drum head offers a strong fundamental tone with a long sustain. This 13" head uses an exclusive 12mil film made especially for Evans. That extra 20% thickness gives the G12 the open and warm tone of a traditional single-ply with the increased durability, attack, projection, and a dense and centered pitch that other single-ply heads lack.

Evans G12 clear heads are available in sizes 6"-20"
