## Description

The Ron Vaughn LBM-3B Large Woodblock Mallets feature 13" matched and balanced birch shafts that are 1/4" in diameter with a plum color band. The weight and density of the LBM-3 mallet head has been designed

through years of live performances and studio work by Ron. To get the pure sound of larger blocks and temple blocks, these mallets have an ideal mallet head weight-to-instrument ratio. Deliver the full range of tonal sound offered by larger blocks and temple blocks every time you practice, perform, or record.

The LBM-3's can also be used briefly on cymbals for Multiple Percussion parts that move too quickly to allow mallet changes. For regular/extensive suspended cymbal mallet playing, use Ron's CymM-4's and CymM-5's.
