

Drum Workshop DWCP9700 Boom Cymbal Stand

\$249.99

Product Images

Description

The Drum Workshop DWCP9700 Boom Cymbal Stand is used by more top professionals than any other stand on the market. Drummer-friendly features like toothless tilter with Techlock, adjustable cymbal seat, integrated memory locks and heavy-gauge tubing make these stands road worthy and reliable beyond compare.

Features:

Cymbal Seat Adjustment can be raised or lowered and quickly locked in place to adjust cymbal movement as

needed.

Integrated Cymbal Seat & Wingnut Felt keep your parts on the stand or in your hand... not on the floor, where they always seem to disappear!

The Toothless Tilter with TechLock allows for infinite adjustment and secure positioning.

The TechLock secondary drum key locking system is inspired by working drum techs. On all DW 9000 hardware, it's a safe-guard against slippage.

Plastic Tube Insulators inside the heavy gauge tubing are a necessity in recording situations to avoid rattling when drum mics are placed close to stands.

Hinged Memory Locks are included at tube joints, cymbal arms and tripod leg assemblies to guarantee 100% repeatable, precise height settings every time.
