## Description

The OffWorld Invader V3 Series Pads feature an advanced polymer custom material, DarkMatter, that comes as close to replicating the feel of playing on a Kevlar style marching head as any that have come before

Another key feature is the patented Rim available in various colors, is nearly unbreakable, and designed to inflict far less damage to sticks than metal rims, the Invader V3 rims produces great rim shots

At 13.75", the V3 fits comfortably inside the rim of a 14" drum while offering as close to actual snare surface area as possible. And at 5 pounds, there is enough weight and heft to provide a solid, stable foundation beneath your sticks, but not too heavy to carry with you.

The Invader V3 is also available with a Black, Red, White, 3D Blue, Gunmetal, or Blue Chameleon Vinyl/Mylar Laminate surface. (VML) The Vinyl/Mylar Laminate covers the full span of a 12" diameter playing surface, maximizing volume and articulation across the entire pad.
