Description

The Innovative Percussion Dan Moore DM21 Medium Vibe/Marimba Mallets produce a full, warm, resonant tone with a tight, focused attack for solo marimba and vibes. The mallet's "Bel-Canto" sound provides an excellent timbre on extended range vibes, or can be used for a soft vibe mallet in a small combo. This series of marimba/vibraphone mallets was developed for musician, composer, and educator Dr. Dan Moore. For Dan, creating music is the art of sculpting sound. Whether in a live concert or in the recording studio, making art with sound is all about choosing the right tools to chisel, smooth, hammer, and shape your music. All the mallets in the line highlight Moore's signature full-bodied, resonant, and "fruity" sound. These mallets work well on vibes and marimba and can be mixed and matched to help you create your own sculpture in sound.

Rattan Handles
Black Cord
Yellow Tape
