Description

The projection and durability of Evans G14 clear batter heads make them one of the best selling drum heads on the market. This versatile 10" head uses premium quality, 14mil film instead of the industry standard 10mil. This allows the G14 to deliver unprecedented durability without losing the strong dynamic response of a single-ply drum head. G14 heads are ideal for use in high-volume performance situations, and can withstand heavy playing while projecting through the mix to provide a full, aggressive sound.

Evans G14 Clear Drum Heads are available in sizes 6"-20"
