

# Evans EMAD Heavyweight BD20EMADHW 20" Bass Drum Head

Your Price \$52.99

MSRP \$113.60

## Product Images

## Description

The EMAD Heavyweight bass batter head redefines the sonic capabilities of the acoustic bass drum. Combining two plies of identical 10mil film with the groundbreaking EMAD system, the EMAD Heavyweight is the thickest, most durable bass head in the Evans product line. With the EMAD system, additional muffling isn't necessary. Two different muffling rings are provided in order to adjust sustain and tonal focus. If maximum low-frequency response with accentuated attack is the goal, the EMAD Heavyweight will make it happen!

### Key Features and Benefits

Construction: 10mil + 10mil with EMAD system

Combination of films reduces frequency of motion, creating pronounced low-frequency response with an accentuated attack

20mil thickness provides maximum durability for the heaviest of hitters
