Description

The Innovative Percussion Chris Lamb CL-BD9 "Rogue" Bass Drum Mallets are hard core mallets that remove the edginess of the "Classic Wood" model and fill out the more subtle rhythmic passages. Once again, the tapered handles add an element of dexterity that supports a lightning response required by many parts.

The Chris Lamb bass drum mallets line has been engineered carefully with weight distribution thoughtfully considered. Some are designed to be nimble in the hand and snappy off the drum while others are intended to allow a lingering weight at impact. In all cases, they will address the feel you are looking for and the sounds you are imagining. Sold in pairs.
